Freudenberg opens new manufacturing facility in China

- **Freudenberg Filtration Technologies Business Group's largest filter manufacturing facility worldwide**
- **Greater health awareness leads to increase in demand**
- **Focus on sustainability**

Weinheim, October 22, 2021. Freudenberg Filtration Technologies (FFT) today announces that it has opened a new manufacturing facility in Shunde (Foshan City), China. With a total investment of some 50 million euros and a floor area of 65,000 square meters, the site is the company's largest manufacturing facility worldwide. The new global research, development and manufacturing hub will produce filters for air purifiers, among others. The investment is driven by greater health awareness as well as an increase in the demand for air and water purifiers. "China is a strategic market for Freudenberg. Many of our customers are based here and it's therefore crucial that we also have a local presence," says Dr. Mohsen Sohi, Freudenberg Group CEO.

Home to new administr

“Efficient production lines, a modern R&D center and motivated employees will enable us to provide our customers with superb innovations and improved product and service quality,” says Dr. Andreas Kreuter, Freudenberg Filtration Technologies CEO.

Jianmin Li, Global Vice President Consumer Division says: “Our customers will benefit from improvements to our R&D
